**TO:
HIRING MANAGER,
SOFTWARE ENGINEER - WEB, ACCEDO.TV**

I've enjoyed the opportunity of working with the team from Accedo when I joined Telstra twelve years ago to reinvigorate Big Pond TV. If I'm not mistaken your Head of Delivery was with me on the team at Telstra before he joined you.

And while I used to taunt Matt Kossatz with the idea of my joining Accedo, it wasn't something that we could resolve. If we can resolve the issue now, that would be superb.

I see that there are currently several roles open across different locations within Accedo and look forward to being able to work with your team to best leverage your company and my skillsets.

Whether it's through my experience developing and driving change in HbbTV, building media focused content Websites, adopting Roku development locally, or my wealth of knowledge in Web technology stack, I'm sure we can drive opportunity
